

FUELBAY™ CARE

FuelBay™ hydration and nutrition storage make refillable liquid and gel storage quickly accessible and hidden within the frame.

INCLUDED PARTS

- FuelBay™ Bottle
Holds 22oz + water
- FuelBay™ Nutrition
Holds up to six 32 gram gels
- FuelBay™ Hose
Fastens magnetically
- FuelBay™ Security Bolt
Security for a quiet ride

TOOLS NEEDED

- 4mm Wrench
- Long Thin Bottle Brush
- Long Pipe Cleaner Brush
- Dish Soap
- Optional Bottle Cleaning Kit

CLEANING STEPS

1. Before removing FuelBay™ Nutrition and Bottle storage remove security bolt located on the underside of the top tube with a 4mm wrench.
2. Remove hydration bottle by grabbing the plastic tabs and pulling up.
3. Next remove the nutrition storage by pinching in the middle so the metal tabs are released, then pull it out of the frame.
4. To clean bottle and nutrition storage use a long thin brush with dish soap. Rinse with water until there is no more soap.
5. Use a long pipe cleaner brush to thoroughly clean hose with soap and water.
6. When storage and hose is fully dry, reinstall on bike starting with the nutrition storage and then pushing hydration bottle.
7. Ensure the Security Bolt is inserted and tightened to 1Nm.

IMPORTANT: To prevent damage do not wash any FuelBay™ item in the dishwasher
